EXPERIENCE

BACKEND DEVELOPER

Samplemed (March 2021 - Present) - Brazil

- Working on a new insurance project using python/Django/DRF/GraphQL using best practices such as TDD.
- In terms of architecture the project is microservice based, in which every app is a package.
- I was the first python dev to initiate the core of this system and the packages creation.
- implemented: mptt model architecture, unit tests, graphql, AES256 (advanced encryption), multi-tenant implementation and many more.

BACKEND DEVELOPER

D3.do (February 2021 - April 2021) -

- Working on big projects for real customers using Python/Django and C#/.NET core technologies in a fast work environment.

WEB DEVELOPER - INTERN

Babylon Radio (Aug 2020 - Dec 2020) - Ireland

- Maintain the company's platform based on WordPress, HTML, CSS and PHP with more than two thousand daily users.
- Working on daily challenges together and remotely with developers from around the world.
- Impact: I helped the company to implement the premium subscription using Thrive themes and hard code.

FREELANCER WEB DEVELOPER

D3.do (February 2021 - April 2021) -

- In this company I had the opportunity to develop dynamic websites with HTML, CSS and JavaScript for the company's customers.
